

## AR's Easily Serviceable "A" Series Amplifiers

AR's "A" Series amplifiers are quick and easy to service. Watch this video to learn more about how critical components are readily accessible for maintenance.

## Testing 4D Imaging Radar Sensors

Ultra-high-resolution imaging radars provide detailed images of the radar's surroundings. Learn how to test and validate these sensors with dSPACE's new DARTS 9040-G radar target simulator with true 5 GHz bandwidth.

## Exodus 80 MHz to 6 GHz Quick Walkthrough

Enjoy this brief Exodus video highlighting some of the company's 80 MHz to 6 GHz amplifiers. Visit the website to see their entire product range 10 kHz to 50 GHz.

## New Blog Post: Supply Chain Security & Infrastructure ICS/OT

Keysight Technologies' Senior Industrial Solutions Manager, Gal Ow, covers what is supply chain security and what it means to Critical Infrastructure ICS/OT in a new blog post.

## Overcoming Technology Barriers

Passive components such as power dividers, combiners, couplers and hybrids are indispensable parts of wireless systems. Micable is overcoming the technology barriers with higher frequency, wider bandwidth, higher power, better performance and smaller size.

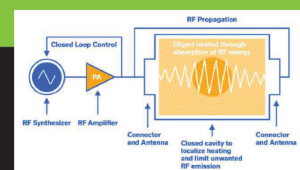

**Micable**

## Turnkey Solid-State Amplifiers for ISM RF & Microwave Energy

The realization of RF and microwave energy through solid-state technologies has enabled unprecedented control over frequency and power for more sensitive applications, read more in this blog post.

## New Online Engineer Tool

Passive Plus, Inc.'s new online Capacitor Application Program (C.A.P.) helps engineers and designers select capacitors by inserting basic capacitor requirements. C.A.P. then produces scattering matrices charts, electrical parameters and available mechanical options.

## New Products for 2021 and a Message from Signal Hound's VP

Learn about Signal Hound's proven products: SM200C/B, BB60C, SA series, VSGs and Spike in this new video. Check out the SM435B and BB60D coming October 2021 and Q1 of 2022.

## Pre-Tinned (De-golded) PCB Connectors

SV Microwave's Pre-Tinned (de-golded) PCB Connectors avoid gold embrittlement to create a stronger bond between the PCB connector and board surface. Learn more about these connectors in SV's new video.
