

ADI Leaders Take Center Stage

Analog Devices depicts an overview of the company, depth and breadth of technologies and system solution expertise in the Aerospace and Defense arena in this new video.

Solid-State RF Amplifiers

This new web section features Comtech's capability to develop unique solutions to customer performance specifications. Comtech designs and develops custom SSPAs for military or commercial programs, specializing in EW jammer, radar and communication applications.

SSPAs Turnkey ISM RF & MW Energy Solutions

An introduction to Mini-Circuits' game-changing line of solid-state power amplifiers (SSPAs) for RF and microwave energy applications.

Automatic Fixture Removal Software Plug-in

Automatic Fixture Removal is an intuitive software plug-in used to accurately measure hard to access devices, such as SMD-sized components mounted on a fixture.

New Logo and Website for Gowanda

Gowanda launched a refreshing new logo and a redesigned website targeting the needs of electronic design engineers. The site offers advanced parametric search tools and a structured layout to deliver a simplified user experience.

White Paper: A Closer Look at Simulating TVS Diodes for ESD Protection

This paper introduces XFtd's transient EM/circuit co-simulation capability, which combines the strength of 3D full-wave electromagnetic simulation with the flexibility of circuit solvers.

New Landing Page for Precision RF

Samtec announces a new landing page for its Precision RF interconnect solutions (18 to 110 GHz). The simple navigation provides direct access to product information, data sheets and models.

New Software and Drivers

LadyBug's new software is designed for future operating systems. Additionally, ATE users can use 32-bit software in 64-bit systems with no special drivers.

Celebrating 30 Years of Shattering Performance Barriers

Since 1991, Marki Microwave has invented technologies that empower the RF and microwave industry to design faster, simplify production, eliminate complexity and shatter performance barriers.

End Launch Connector Catalog

Southwest Microwave continues to evolve the end launch connector product line, now offering robust standard and narrow block thread-in models, DC to 110 GHz.

Capability ConvergeRF Spliced Cable Assembly in Application Note

SV Microwave's ConvergeRF cable assemblies transition seamlessly from Ø.086" to Ø.047" cable types through a direct solder connection maximizing routing capability in a tight space while maintaining low insertion loss.
